Microsoft Federal

Cloud solutions optimized for the Centers for Medicare and Medicaid Services (CMS)

Microsoft Azure provides cost-effective solutions through artificial intelligence and analytics, mainframe modernization, app innovation, and elegance in platform and software-as-a-service.

Deliver trust at scale
Azure's highly secure cloud foundation helps modernize security by enabling Zero Trust architecture and offering multi-layered, built-in security controls like data classification, multi-factor authentication, encryption, and endpoint detection and response.

Microsoft Azure Government (MAG) cloud
MAG cloud supports Linux, Windows Server, open-source databases, and services from partners like Databricks and Snowflake. Azure PaaS, containers, and serverless offerings provide zero infrastructure management, dynamic scalability, and per-execution pricing.

Azure API for FHIR®
A new tool to help health systems interoperate and share data in the cloud. The API now gives you the ability to integrate FHIR-enabled electronic health records (EHR) data with Microsoft Teams.

For more information from your dedicated Microsoft CMS team, contact Jung Yoon at juyoon@microsoft.com.
