BeyondTrust
Mitch Mitchell
(703) 599-6263
mmitchell@beyondtrust.com
BeyondTrust's Website
BeyondTrust is the worldwide leader in Privileged Access Management (PAM), empowering agencies to secure and manage their entire universe of privileges through 3 primary technology pillars: Privileged Password Management, Endpoint Privilege Management, and Secure Remote Access. Our integrated products offer the industry's most advanced PAM solution, enabling agencies to support Zero Trust mission goals by quickly shrinking the attack surface across traditional, cloud and hybrid environments.

The BeyondTrust Universal Privilege Management approach secures and protects privileged identities, sessions and access, giving agencies the visibility and control they need to always verify, reduce risk, achieve compliance, and boost operational performance. Our products enable the right level of privileges, for just the time needed (least privilege), supporting an increased focus on Zero Trust as identity becomes the new perimeter.

Pure Storage, Inc.
Julie Baur
(505) 227-1106
jbaur@purestorage.com
Pure Storage, Inc.'s Website
Pure Storage provides industry-leading flash storage solutions and a simplified Evergreen business model that our customers love. With our Pure as-a-Service platform, customers can transform their enterprise storage environment into a highly efficient storage utility. Pure as-a-Service offers on-prem and cloud storage as a service to enable you to efficiently operate a hybrid cloud by unifying your environment with one subscription and one set of storage services. Pure as-a-Service leverages the industry-leading, field-proven, FlashArray™ and FlashBlade™ infrastructure to achieve success with peta-scale organizations and a 100% retention rate.

Pure transforms the government's journey toward IT Modernization by enabling agencies to fully leverage data assets, optimize workloads across cloud and on-premise deployments, and integrate emerging technologies, such as AI at scale, which will help your agency meet FITARA compliance requirements.

Rescale
Kevin Kelly
(508) 330-9663
kpk@rescale.com
Rescale's Website
Rescale accelerates digital R&D by delivering the automation that is critical to get the most from the cloud, without burdening researchers, engineers, and scientists with the complexities of cloud plumbing. The Rescale platform serves as a control plane that allows users to optimize simulation workflows for cost and performance, and support new methods of secure collaboration across teams.

Security is a top priority for Rescale and its customers. The Rescale platform satisfies the compliance and security requirements for cloud by leveraging a DOE issued ATO and meeting the requirements for FedRAMP.

Starfish Storage Corporation's Website
Scaling to 100s of petabytes and billions of files, Starfish software is ideal for HPC and AI workloads and, specifically, government lab infrastructures. Our powerful metadata catalog, scale-out data mover, and batch processor enables organizations to discover and manage unstructured data simply, securely, and with precision. Common use cases include data cleanup (archive and disposition), data preservation (long-term archiving and data integrity assurance), data protection (backup and replication), workflow automation (instrumentation, curation and pipelines), content classification (tagging and key-value metadata), and reporting and analytics (capacity reporting, aging and chargeback). And that's just the start. We invite you to visit our booth and contact us for a live demo.
